Vismay S Raj

Software Developer

Highly skilled and motivated software developer with 3 years of experience in React development. Demonstrated expertise in building robust and scalable web applications, utilising cutting-edge technologies and best practices. Strong understanding of front-end development principles, including component-driven architecture, state management, and responsive design. Collaborative team player with effective communication skills and a track record of delivering projects on time.. Committed to staying updated with industry trends and continuously enhancing skills to drive innovation and exceed client expectations.

Experience

2020 - 2023
CEEGEES Software Solutions ∣ Bengaluru, Karnataka,India
Software Engineer

- **Scam/Spam reporting Web Application**

1. Created a react-based app that leverages crowdsourcing to detect and report scams/spam, featuring two distinct sections. Users have the ability to submit evidence of fraudulent calls and verify the legitimacy of links/UPI IDs to identify potential malicious intent.
2. Led UI development for the web application, utilizing React.JS, Node.JS to create intuitive and visually appealing interfaces.
3. Built robust APIs and integrated them seamlessly into the web app, enhancing its functionality .
4. Collaborated with cross-functional teams, including designers and backend developers, to ensure effective implementation and integration of features.
5. Participated in code reviews and conducted thorough testing to identify and fix bugs, improving overall software quality and user experience.
6. Researched and implemented best practices, coding standards, and emerging technologies to optimize development processes and maintain high-quality standards.
7. Actively contributed to the agile development process, attending daily stand-ups, sprint planning, and retrospective meetings to ensure efficient project management and timely delivery.

- **Created official website for a tech company**

1. Developed a visually appealing and user-friendly website using Gatsby JS.
2. Implemented key features and functionalities to showcase the company's products and services effectively.
3. Collaborated with the design team to ensure a seamless user experience and adherence to branding guidelines.

- **Multilingual Website Development**

1. Enhanced an existing website to support multiple languages, allowing users to view content in their preferred language.
2. Implemented language selection functionality and integrated translation services for seamless localization.
3. Ensured the consistency of design and content across different language versions.

- **Customer Feedback and Refund Platform for E-commerce Applications**

1. Designed and developed a robust platform for gathering customer feedback and facilitating the refund process for multiple e-commerce applications.
2. Integrated with relevant APIs and databases to fetch customer data and initiate refund requests securely.
3. Implemented features such as user authentication, data validation, and reporting to enhance the platform's functionality and user experience.

- **Faculty Training Web Application**
1. Developed responsive web pages using HTML, CSS, and Gatsby.js to ensure optimal user experience across various devices. Integrated content management system (CMS) to dynamically update and manage website data using WordPress.
2. Utilized Google Analytics and GA4 to track website traffic, analyse user behaviour, and generate reports for data-driven decision making.
3. Added an extra portal that supports multiple languages (English, Vietnamese, Chinese) for requesting certificates generated by the organization and seamlessly integrating them with their official website.
